VIRTUAL INTERVIEW

Students will learn the importance of having a professional set-up for virtual tasks such as interviews and meetings.

- Have the student sit down so they can see themselves on the laptop, so they can see what a professional setting would entail.
- Go over the importance of having a quiet space, good lighting and an appropriate backdrop.
- Show them how to use the blur background feature as a way around not having a solid or professional backdrop.
- Mention how finding a place with limited noise and good connection is a key factor in having a successful virtual experience.
